

TEAR-OUT PROCEDURES FOR COUNTERTOPS

1. Tear-out orders will require a 50% deposit.
2. We require a completed and signed Purchase Order with all the information filled out. Information must include sink sizes and cook top cutout size.
3. All appliances must be on site at time of template (bowls, cook tops, faucets etc.)
4. You will need a plumber to shut off water supply and disconnect plumbing from sink, and/or an electrician to disconnect cook top.
5. All countertops **must be cleared** of any/all items.
6. Counters will be torn-out at time of template. You will be without countertops from template to install. If you would like, we will set existing counters back on your cabinets. We will not reconnect services.
7. We will be careful in removing the existing top, but we are not responsible for damage to walls, tile backsplashes or cabinets. Further we are not responsible for faucets or appliances that could be damaged in the removal process.
8. We will remove old tops from the job site if you request this service.
9. After a new top is installed, we do not reconnect services. You will have to schedule these services with a plumber and/or electrician.
10. We **do not** touch gas. A plumber must be hired to disconnect and reconnect a gas cook top and the range if it is in the way.

I have read and agree to the above conditions.
